

REMARKS

The applicant has carefully studied the outstanding Official Action/Advisory Action, dated August 31, 2010. The present response is intended to be fully responsive to all points of rejection raised by the Examiner and is believed to place the application in condition for allowance. This response is intended to clarify questions posed by the Examiner in the aforementioned Advisory Action.

IN THE CLAIMS

The Examiner has requested that the term "ambient environment" used in claims 1, 14 and 26 be defined. The term "ambient environment" is intended to indicate an environment which *inter alia* is at atmospheric pressure.

Rather than just defining the term, the effective definition of the term has been inserted into the three mentioned claims substantially as found in the text in place of the allegedly problematic term "ambient environment".

These amendments are supported by the wording of page 8, lines 6-7 and also page 12, lines 18-19 of the published PCT document. No new matter has been added.

Applicant respectfully believes that the examiners concerns have been addressed.

CONCLUSION

In view of the foregoing amendments and remarks, as well as the remarks submitted with the Amendment dated June 22, 2010, the instant application is believed to be in

condition for allowance. Favorable reconsideration and allowance of the application are respectfully requested.

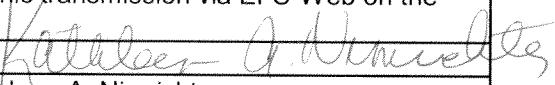

Respectfully submitted,

FAY SHARPE LLP
